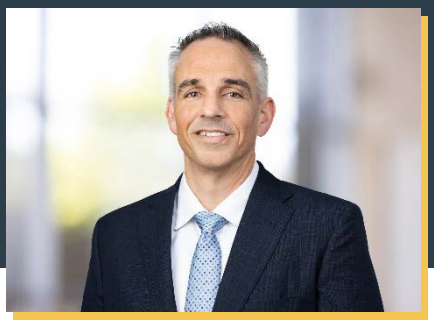
GARY N. DEVENISH

VICE PRESIDENT



AREAS OF EXPERTISE

- Asset Valuations
- Standard of Care
- Technology Assessment
- Project Feasibility
- *PRISM* Refining Industry Modeling and Database
- Renewables and Regulatory
- Independent Engineer / Mergers & Acquisitions
- Markets & Strategy
- Insurance Claims
- Water / Marine
- Operations and Maintenance
- Product Quality
- LP Planning / Practice
- Physical Asset Appraisal
- Pricing
- Toxic Tort
- Crude Oil Valuation

INDUSTRIES

- Chemicals and Petrochemicals
- Power Generation
- Petroleum Refining
- Renewable Fuels
- Transportation and Storage

EDUCATION

- University of Texas at Austin, McCombs School of Business M.B.A. (2009)
- Texas A&M University B.S. Chemical Engineering (1995)

SUMMARY OF EXPERIENCE

Mr. Devenish has 25 years of experience working in petroleum refining. Gary has worked in process engineering design, research and development, field services, technical service, operations management, and planning and economics. His engineering and operations experience covers various refinery and petrochemical processing operations. He has been involved in commissioning and starting up several new and revamped process units worldwide.

Gary has held hands-on operations and planning and economics management roles for the two largest U.S. refiners. His economics and planning experience includes running LP simulations, including AspenTech's PIMS model. Immediately before joining Baker and O'Brien, Gary was Operations Manager for an operations complex including hydrotreating, hydrocracking, and SMR units.

Gary's assignments at Baker & O'Brien have included local and regional market analyses, strategic planning, technology due diligence, and serving as a lender's engineer. His expert witness support assignments have included refinery operations and lost opportunity assessments, power plant damages, equipment performance, and various EPC-related matters. Gary has testified as an expert witness in depositions and international arbitrations.

PREVIOUS POSITIONS

2005-2015: ***Valero Energy Corporation***,
Complex Operations Manager
Manager, Refinery Optimization and Planning
Regional Optimization Manager
Staff Planning and Scheduling Engineer
Engineering Group – Group Leader, Staff Process Engineer

2002-2005: ***Marathon Petroleum Company***,
Operations Superintendent
Engineer III, Crude and Sat Gas Units

1996-2002: ***UOP, LLC***,
Chief Technical Advisor
Technical Advisor
Development Engineer
