

AREAS OF EXPERTISE

- Engineering, Procurement, and Construction (EPC)
- Accident / Incident Investigation
- Standard of Care
- Operations and Maintenance
- OSHA-related
- Environmental
- Pipeline
- Safety

INDUSTRIES

- Transportation and Storage
- Oil & Gas Production
- Natural Gas and NGLs

EDUCATION

- University of Southern Mississippi, Hattiesburg, MS
M.S. Construction Engineering Technology (2002)
- Auburn University, AL
B.A. Religious Studies (1999)

CERTIFICATIONS

- Certified Construction Manager (CCM #2972)
- Project Management Professional (PMP #1570824)
- Occupational Safety and Health Standards for the Construction Industry (OTI 510)
- Occupational Safety and Health Standards for General Industry (OTI 511)

SUMMARY OF EXPERIENCE

Scott Cunningham has over 20 years of experience in civil engineering, construction management, and infrastructure development across the energy, heavy industry, and commercial business sectors. His expertise spans the planning, design, procurement, construction, commissioning, and operational turnover of complex, high-value capital projects. Scott has led the construction and delivery of major industrial facilities, midstream energy infrastructure, manufacturing plants, storage terminals, pipelines, and utility systems. He has overseen large-scale greenfield and brownfield projects, developed and implemented construction management strategies, directed project execution, and ensured compliance with contractual, technical, safety, quality assurance, and quality control (QA/QC), and regulatory requirements.

Scott began his career as a Project Manager working on civil engineering and environmental management for commercial and residential projects. At ThyssenKrupp Stainless, Scott led civil engineering and construction teams in the execution of high-value steel production facility projects. As Staff Construction Manager at Williams, Scott managed the construction of large gas processing facilities and acted as the liaison between project engineering teams and construction contractors. Prior to joining Baker & O'Brien, Scott served as Managing Director, Construction-Midstream Capital Projects at Phillips 66 in Houston.

Since joining Baker & O'Brien, Scott has advised clients on Engineering, Procurement, and Construction (EPC) contract disputes, insurance claims, and damage assessments, providing detailed analyses of project performance, contract obligations, and resulting damages. He has also assisted clients in matters involving personal injury, construction accidents, liability analysis, accident causation, and allocation of responsibility among project stakeholders.

PREVIOUS POSITIONS

2019-2025: Phillips 66 Company,
Managing Director, Construction – Midstream Capital Projects

2013-2019: The Williams Companies, Inc.,
Staff Construction Manager

2008-2013: Thyssenkrupp Stainless USA, LLC.
Construction Manager (Civil Projects)
Manager, Utilities & Facilities, Cold Rolling Works
Manager, Site Utilities, Roads and Drainage

2007-2008: SE Civil LLC.
Project Manager

2005-2007: Paradigm Engineering Ltd.
District Erosion Control Specialist

2002-2005: SE Civil LLC.
Project Manager
